## **National Security Technologies Names Holt President**

**LAS VEGAS, Nev.** – The Board of Managers of National Security Technologies, LLC (NSTec), the company that runs the Nevada National Security Site (NNSS), has named James L. Holt president of the company.

Holt has served as Acting President since November 2015. Prior to that, he served as Vice President for Operations, overseeing operations and infrastructure, emergency management, safeguards and security, mission assurance and safety, nuclear operations, and infrastructure planning.

From 2012 to 2014, Holt served as the Vice President for Program Integration, ensuring that operations and program execution were coordinated and integrated across directorates through cross-utilization of personnel, leveraging of capabilities and facilities, and coordinated program and business development.

From 2006 to 2012, he served as Director of Defense Experimentation and Stockpile Stewardship for NSTec, directing the company's involvement with experiments at the site and its work with the National Laboratories to ensure that the nation's nuclear weapons stockpile remains safe, secure and effective.

From 2004 to 2006, while employed at Lawrence Livermore National Laboratory (LLNL), Holt was assigned as science advisor to the National Nuclear Security Administration (NNSA) in Washington D.C. His responsibilities included serving as advisor to Thomas D'Agostino, deputy administrator for Defense Programs, advisor to the Secretary of Energy Advisory Board (SEAB) on Infrastructure, and advisor to the Office of Transformation.

From 2001 to 2004, Holt served as Associate Director for Operations at Los Alamos National Laboratory (LANL). He managed activities including nuclear and non-nuclear

facilities, infrastructure, environmental programs, institutional safety, security, project management, and construction.

NSTec has been the management and operating (M&O) contractor for the NNSS and satellite facilities in California, New Mexico, Nevada, and Washington, D.C. since July 2006. The company's work at the site involves development, testing, evaluation, and deployment of technologies to help address national and global security challenges, including nuclear deterrence, nonproliferation, and counterterrorism. NSTec serves under contract with the Nevada Field Office of the NNSA, a quasi-independent agency within the U.S. Department of Energy.
