# Update VMware Horizon Client

### VMware Client Update

≡ -

VMware frequently updates their application. In order to check for an update you will have to

access the options menu at the top right of the window.

\*\*This process does not happen automatically so be sure to check often.

## **1)** Open up the **VMware Horizon Client** and select the **Hamburger Menu** (three horizontal lines) in the top right corner.

#### 2) Select Software Updates

**3)** Select **Check for Updates** on the window below. If that window does not appear proceed to the next step
