EXPERIMENTAL FACILITY (BEFF) FACILITY IS HEREBY AMENDED AS FOLLOWS:

This Amendment 002 serves to provide response to questions received as stated below. Please note, responses to Question 1 and Question 2 were provided via Amendment 001, dated July 20, 2026.

3. **Question 3:** The offeror is required to provide a facility that adheres to MSTs's Code of Record. Please provide these requirements so we can ensure that we are compliant.

MSTS Response to Question 3: The following lists the primary codes, standards, and Department of Energy (DOE) orders that comprise the facility's approved Code of Record (COR):

- *Uniform Mechanical Code, 26th Edition, 2018 (not the latest)*
- *Uniform Plumbing Code, 26th Edition, 2018 (not the latest)*
- *IBC, International Building Code, 2015 (not the latest)*
- *ICC ANSI A117.1, Accessible and Usable Buildings and Facilities, 2009 (not the latest)*
- *IFC, International Fire Code, 2015 (not the latest)*
- *IEEE Standard C2, National Electrical Safety Code, 2017 (not the latest)*
- *NFPA 101, Life Safety Code, 2024*

4. **Question 4:** The RFI requests budgetary information, schematics, inventory availability, etc. Do you intend to procure this building based on responses to this RFI, or will there be a subsequent RFQ/RFP?

MSTS Response to Question 4: *MSTS does not intend to make an award based on response(s) to this EOI / RFI. The information gained will be utilized by MSTS solely for market research and budgetary estimation purposes. MSTS anticipates issuing a formal solicitation in the near future to request proposals. An award will only be made at the conclusion of that formal solicitation process.*

5. **Question 5:** Can you justify a direct negotiation through our GSA contract?

MSTS Response to Question 5: *No. In accordance with FAR 8.405, ordering activities are required to provide a fair opportunity to prospective Schedule contract holders unless an authorized exception to competition applies.*

6. **Question 6:** Will the BEEF Modular be required to be non-combustible construction Type IIb?

MSTS Response to Question 6: *Currently, MSTS believes either Type II-A or Type II-B construction is acceptable.*

All else remains unchanged.

When submitting your response, please acknowledge receipt of this amendment by indicating on the Offeror's response the number of amendments.
